

FEATURE

ADVANTAGE

BENEFIT

Removes 99.99% of all liquid water, oil emulsion fluids and solid particulates

Expel is a 3-in-1 solution which can replace several conventional compressed air filters

Protects pneumatic equipment from damage and expensive maintenance and repair costs.

10 year guarantee

No filter or filter element replacements for 10 years

You have complete peace of mind that if anything goes wrong with your filter, you just need to get in touch with us.

NO replacement filter elements required

Expel is not associated with any ongoing costs and saves time spent replacing parts

Reduces costs, wastage going to landfill sites and maintenance.

Energy efficient design

Far more energy efficient than other methods of compressed air preparation.

Saves energy costs and reduces environmental impact

Fit and forget

No maintenance required

No reduction in performance over time as there are no internal elements to replace. However, your Expel unit can be fully dismantled, cleaned and reassembled.

Stainless steel exterior

Highly robust, durable and corrosion resistant

Suitable for use in any industry, including medical, food, offshore oil/gas, aggregate, mining, etc.

Designed and tested in accordance with ISO 12500

This is the latest ISO standard for compressed air filtration

Meets stringent testing standards for quality and performance
