

All hoses are not the same

ERIKS Hose Technology

know-how makes the difference

ERIKS

So much more than great Industrial Hose Supply

ERIKS' KNOW-HOW KNOWS HOSES

When you're buying a basic everyday product like hose, it's tempting to make your choice on price alone.

But although other hoses might look the same, only ERIKS hoses come with ERIKS' know-how. And it's know-how that makes the difference.

Choosing hose

- We offer technical advice via our in-house Sales department, on choosing the correct hose specification for your particular application
- We are also able to send an Application Engineer to site to complete a site survey and advise on the best product for your application
- We have an extensive and comprehensive range to meet all your hose requirements: ducting, rubber hose, PVC hose, tubing and more

Buying hose

- ERIKS' purchasing power ensures a highly competitive price for your hose order
- All products are sourced from strategic key partners with whom we work with in a consultative manner
- Fully traceable supply lines ensure the same hose is available every time you order
- We operate from 61 distribution sites nationwide to ensure high availability and fast delivery
- All our hose is ISO9001 certified and carries a 12-month warranty
- If required, we can offer a complete engineering solution which goes beyond just hose, to enhance efficiency, productivity and safety

SUPERIOR DUCTING SOLUTIONS

ERIKS ducting products are manufactured from specially-developed materials and compounds to provide superior properties and unique benefits.

Ducting hose

- Ester- and ether-polyurethane (used in ducting types 355, 356, 382, Vinylflex, Superflex)
- PVC (Vinylflex, Superflex)
- Silicone

Product benefits

- Higher mechanical stability
- Less abrasion
- Improved chemical and hydrolytic stability
- Improved low-temperature flexibility

Made for your market

The chemical formulation and construction of ERIKS ducting makes it perfect for use by:

- The pharmaceutical industry
- Printing and medical OEMs
- OEM equipment general repairers

Ideal for your application

Crush-proof, highly flexible, abrasion resistant, flame retardant and ATEX compliant, ERIKS ducting is ideal for:

- Powder handling
- Tablet handling
- Dust extraction

EVERY HOSE YOU NEED

As an industry leader in industrial hose, ERIKS can meet every hose requirement you may have.

As well as holding an extensive stock of off-the-shelf hose, we can design and manufacture anything from a single custom-made part to a full plant-wide system.

Hose materials

- Rubber
- Plastic
- Metallic
- PTFE
- Silicone
- Composite

Product areas

- Food, milk, beer, wine
- Steam, air, water

Made for your market

- Offering maximum value backed by long experience and extensive expertise, ERIKS offers hose solutions for:
 - The chemical industry
 - Petrochemicals (refineries and fluid storage)
 - The food and beverage industry
 - General industrial use

Ideal for your application

- Tanker loading and offloading (chemicals, milk, beer)
- Product movement (beer, wine, milk)
- Utilities (water and air interconnection)
- Steam handling

The Right Hose for the Right Application

PVC hose is the most widely-used hose available.

Whatever industry you operate in, and whatever the scale of your operation, there is almost certain to be at least one length of PVC hose somewhere on your site. To be sure of its quality and availability, make sure you choose it from ERIKS.

Product areas

- Braided PVC
- Green medium duty
- Hi-vac

Made for your market

- Water/waste water transfer
- Compressed air movement
- Slurry movement/transfer

Fully approved tubing

Manufactured from high-quality materials and with full FDA/BFR approval, ERIKS tubing is suitable for a range of markets and applications.

Product areas

- Clear PVC
- Nylon
- PTFE and PE

Made for your market

ERIKS tubing is suitable for:

- Workshops
- OEMs
- Machinery repairs

Ideal for your application

- Air coils
- Compressed air handling
- Water handling

YOUR COMPLETE SOLUTION

When you buy high-quality, guaranteed hose, it makes sense to buy fittings of the same quality with the same support, from the same distributor.

ERIKS offers a complete range of fittings, including bellows, so there's no need to shop around to find the fittings you need.

Key product areas

- NITO, GEKA and general brass fittings
- Cam and groove fittings (camlocks)
- Worm drive and bolt clamps
- Rubber bellows
- Varied plastics i.e. polypropylene

Made for your market

ERIKS fittings are designed and manufactured to work perfectly with all types of ERIKS hose and tubing, in a wide range of markets:

- Agricultural
- Food and beverage
- Industrial
- Pharmaceutical
- Petrochemical

Ideal for your application

ERIKS range of fittings provides solutions for a variety of applications:

- General water and air hose and tube clamping
- Quick-release water and chemical hoses
- General inter-connection of water and air hose and tube

ERIKS bellows are designed for easy and safe connection of vibrating equipment, such as:

- Motors
- Vibrating sieves

ERIKS Hose Technology help you save time, money and mitigate risk.

Time-saving Hose Assembly Kits

Pre-manufactured assemblies supplied to your exact specifications save time and effort.

ERIKS offers hose assemblies – together with full documentation including traceability if required – for standard applications and applications involving aggressive chemicals.

Product areas

ERIKS assembly kits are available for:

- Dual containment
- Composite and chemical hoses
- Metallics
- Corrugated and smooth bore PTFE
- PTFE dip tubes

Made for your market

ERIKS pre-manufactured assemblies carry the relevant domestic and international approvals and certifications for use in a wide range of industries, including:

- Food and beverage
- Gas (Metalflex and Caterflow)
- Engineering (Metalflex and Caterflow)

Hose Testing and Management

- We attend site to complete a survey prior to testing, to ensure our engineers have up-to-date information regarding the site, e.g. PPE requirements, site induction procedure
- We offer a full on-site hose testing service from Bronze, to Silver and Gold, ranging from external visual inspection to pressure testing and the use of the most up-to-date internal inspection cameras, operated by highly-trained and certified technicians
- Our hose tagging and testing system ensures minimum downtime and maximum Health and Safety compliance
- We can set-up a hose database on the internet within 24 hours to securely record all the details of your hoses on-site including test date, test result and test certificate
- You can choose to have the database maintained by our highly trained team members, or have a register sent to maintain yourselves
- We have a dedicated team who are on hand to answer any questions you may have via telephone and e-mail, regarding any aspect of hose testing
