Durable Hose for Beverage Manufacturer

RX Alifixx Solves Hose Failure

ISSUE

Cott Beverages, the worlds largest provider or retailer brand soft drinks, were experiencing premature failure of their food grade hoses. They contacted the ERIKS Integrated Supply staff, who run the Engineering Stores on site for Cott Beverages to look into a solution.

SOLUTION

ERIKS Integrated Supply contacted the ERIKS Hose Technology Centre in Bolton who sent an Application Engineer to site to review the application.

The Application Engineer established that premature failure was due to the existing hoses having a poor ability to cope with twisting forces and over-flexing of the application.

They recommended RX Alifixx, a rubber hose specifically designed for the food and dairy industry. RX Alifixx is easy to clean with a smooth internal wall, and is resistant to animal fats, vegetable oils and cleaning products. This durable, long lasting product has not only satisfied the customers hose failure problem but also ensures that the manufacturers comply with industry regulations.

OTHER BENEFITS

- Longer lasting product reduces cost of replacement hose
- No animal derived ingredients, ensure compliance with food and drink regulations both in the UK and worldwide

FURTHER COMMENTS...

The RX Alifixx hoses were assembled at the hygienic hose manufacturing facility in Slough, then supplied to site where they have operated without any failures.
