ERIKS

Introduction

Tools you can rely on...

At ERIKS we take pride in providing the best tools to enable our customers to complete projects safely, accurately and within the timescales required.

Working closely with our strategic partner, Stanley Black and Decker, we have selected a range of tools which offer the highest levels of quality and reliability.

Safer by design

Ease of use is of paramount importance and with this in mind Stanley Black and Decker have developed tools which are not only robust but are ergonomically designed to ensure maximum comfort whilst reducing the effects of fatigue and ensuring a safe productivity is maintained over a sustained period of use.

Good Vibrations...

Dewalt's range of power tools offer leading vibration levels. Dewalt continues to use innovative technologies to continuously reduce the vibration to which workers are exposed.

it's the Law

The European Physical Agents (Vibration) Directive 2002/44/EC has been in force in all EU member states since July 6th 2005. This directive introduced '**Control of Vibration at Work**' regulations, placing duties on employers to protect workers from vibration and reduce exposure levels. Exposure to vibration can cause long-term health risks. The

Directive was brought in to protect workers from the health problems caused by Hand Arm Vibration – exposure may result in a range of ill health effects collectively known as Hand Arm vibration Syndrome or HAVS. The most well-known health effect is vibration white finger, but other effects include damage to sensory nerves, muscles and joints in the hands and arms.

Those who regularly operate high vibration equipment over long periods of time are at risk however, this can be controlled by good management such as using the correct tool for the job. This requires employers to carry out various duties including:

- Reducing exposure to a minimum
- Providing information and training
- Assessing exposure levels
- Carrying out measurements and reducing exposure, as well as providing health surveillance when the 'Exposure Action Value' has been reached.
- Keeping exposure below 'Exposure Action Value' limit

1010W 115mm Slide Switch SAG No-Volt

- No-volt release switch prevents the unit from starting unintentionally when locked on. Switch must be consciously reset before power is delivered
- Soft start reduces movement of the tool on startup increasing user control
- High efficiency motor design improves performance in demanding applications
- Dust ejection system removes majority of debris from the air which passes over the motor, preventing abrasion and tracking
- Small girth allow comfortable gripping resulting in superior ergonomics
- The low profile gear case allows access in confined areas

W68B-51125

355mm Abrasive Chop Saw

- Horizontal handle for superior ergonomics and less user fatigue
- Quick release clamp results in less time in changing the work piece
- High power abrasion protected motor delivers high overload capabilities for greater durability
- Spindle lock for quick and easy wheel change
- Adjustable spark guard allows user to control the direction of the sparks coming from the machine

701 W - Heavy Duty Top Handle Jigsaw

- Powerful 701 Watt motor with variable speed delivers fast cutting action up to 3100 strokes per minute
- Quick and easy patented keyless blade change system accepts T-shank blades
- Patented anti-vibration counterbalance mechanism and rubber grip provide smooth operation
- 4-position pendulum action controls the aggressiveness or smoothness of cuts
- Tool free adjustable shoe with anti scratch cover bevels to 45 degrees in both directions
- Full wave electronic speed control with feedback ensures that blade speed is maintained under any load for a consistent finish across all materials

2 Way Self-Levelling Line Laser (Horizontal and Vertical)

- Self-levelling cross line laser is accurate to ± 0.3 mm/m in levelling applications
- Self-Levelling up to 4 degrees surface angle with automatic out of level indication, marks a levelled line in seconds
- 2 button operation and low battery indication for ease of use
- Built in magnetic pivot bracket mounts easily on metal surfaces
- Overmolded housing and thick glass protects the tool and helps maintain calibration under jobsite conditions
- Includes 3 x AA batteries for 40 plus hours runtime

Part Number

W68B-51129

38L Construction Dust Extractor M Class

- M Classified to meet EU legislation
- Innovative dual filter cleaning system maintains performance during tough construction applications
- Constant suction power even with the finest concrete and wood dust
- A filter is automatically cleaned every 30 seconds reducing filter clogging and
- delivering constant air flow
- Wet and dry pick up with variable suction control allows for the reduction of suction power if required
- Built-in power take off socket allows power tool connection for automatic switching of the vacuum system

Part Number

W68B-51128

18V XR Brushless Oscillating Multi-Tool

- DEWALT Brushless Motor delivers up to 57% more run time over brushed motors
- QUICK-CHANGE Accessory System allows blades and attachments to be changed quickly without the use of tools
- DUAL-GRIP Variable Speed Trigger provides the ultimate speed and application control
- Bright LED light illuminates dark work surfaces for accurate cutting
- Depth Control Straight Cut Guide increases cutting accuracy for detailed work
- Dust Extraction Adaptor supports use with DEWALT dust extraction vacuums

Part Number

W68B-51134

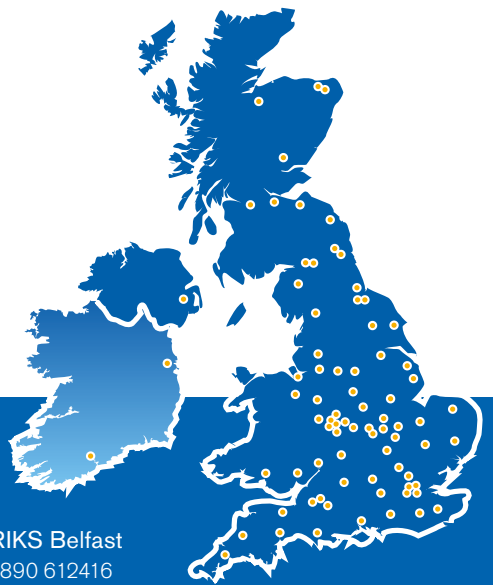

XR Li-Ion AC/DC, Wet & Dry Vacuum

- Operates on 14.4V/18V DEWALT XR battery packs & mains supply
- High efficiency washable HEPA filter traps 99.97% of dust as fine as 0.3 Microns
- On-board hose, cord and accessory storage provides convenient transport and storage
- Vacuums Wet or Dry without the need to change the filter
