

HYGIENE

Hygiene is not a luxury but rather a basic need of every human being. An unsanitary area is like a playground for a range of different bacteria which can cause disease and, in turn, a decrease in productivity. After all, skin diseases are a common cause of absence from work.

A hygienic environment will contribute to the welfare and motivation of your employees.

THE DEB GROUP AND ERIKS: THE ULTIMATE HAND HYGIENE TEAM!!

The Deb range offers a unique structured and coordinated skincare solution for all employees in the workplace. With an extensive assortment of skincare products we reach out to all companies and organisations that put their employees and customers' well-being first. The leading formulations and high-quality dispensing systems always have one objective in mind: to ensure a safe and healthy work environment with cost-effective solutions that respect the environment.

UNIVERSAL CONCEPT

'Universal' is an important concept for the correct use of skincare products and dispensing systems. Deb respects this. Our many years' experience with users of our products and dispensing systems have provided us with an effective overview of the factors that play a role in maintaining skincare regimes. A clear understanding of the products that must be used with each application and the way this should be done is paramount. That's why our products and dispensing systems include universal pictograms, recognisable colours and unambiguous wording.

1 Colour codes:

Are consistently used for all our products, dispensers and training materials so that the product type can be quickly identified.

BESCHERMEN	REINIGEN LICHT	REINIGEN ZWAK	REINIGEN SUPER
REINIGEN ANTIBACTERIEEL	REINIGEN SANITARE RUIJTE	DESINFECTEREN	VERZORGEN

2 Universal pictograms:

Demonstrate each step of the Deb Skin Care System™ and inform the user of the product's objective.

3 Illustrations of use:

Encourage proper hand hygiene and universal visual language.

4 Unambiguous wording:

Ensures correct use of the products.

5 Multilingual product labels:

Make it possible to use the same products in several countries.

6 International article codes:

Simplify administration and facilitate traceability.

ENVIRONMENTALLY FRIENDLY PRODUCTS

Many of Deb's cleaning products are EU Ecolabel certified. This is the official European environmental label. Ecolabel is a voluntary programme in which products must comply with strict technical criteria using a Life Cycle Analyses (LCA). This includes the most important environmental aspects in all phases of the life cycle, including manufacturing, use and disposal.

'Only the very best products, ensuring reduced environmental impact, may carry the EU Ecolabel.'

(European Commission)

A UNIQUE SOLUTION

The unique Deb Skin Care System™ consists of 6 steps that incorporate 'best class' products and support activities:

Protection

Creams that are applied to the skin before work to protect the skin from contaminating substances and hostile conditions allowing the skin to be easily cleaned.

Cleansing

Hand and skin cleansers that are tailored to meet the specific needs and preferences of diverse workplaces.

Care

Conditioning creams that help keep the hands supple, soft and healthy. Healthy skin is extremely important for proper hand hygiene.

Training

Encouraging good skincare practices by providing material for educational and training purposes and to increase awareness among employees.

Audit

Implementing and maintaining the effectiveness of the Deb Skin Care programme by performing audits.
