Superior Hose for Sausage and Bean Line

RX Profixx replaces unsuitable hose for longer life

ISSUE

A large ERIKS Integrated Solutions customer expressed an interest in upgrading several of the hoses on their sausage and bean line. They wanted to switch to an RX hose as they knew that it was a better quality than the hose they were using at the time.

SOLUTION

ERIKS Industrial Hose visited the customers site and recommended changing the milk and dairy hoses that the customer was currently using with RX Profixx, which although it is slightly more expensive than their current hose, it is a far superior quality and will last longer than the six months that their current hoses were lasting. In addition a strengthening shrinksleeve was put onto one end of the hose to prevent over flexing, again adding to the longer life of the hose.

OTHER BENEFITS

- Better quality hose which will last a lot longer than the current arrangement
- Better suited hose for the matter being transported

FURTHER COMMENTS...

In addition the milk hose that the customer was using was not really suited to the acetic acid contained in the tomatoes, whereas RX Profixx is. This will ensure that there is no leakage of product.
