Pump Spares Manufactured For Cider Factory

ERIKS supplier network provide cost effective pump spares

ISSUE

A Cider factory operates 4 critical progressive cavity pumps in their mill process. After a number of years' service the site decided to replace these pump stators and Eriks Pump Technology was approached to supply the critical parts.

SOLUTION

Eriks Pump Technology is aware of ensuring best value for money. With an increasing focus on operational and maintenance cost control, we understand that the price and availability of spare parts is high on the agenda when evaluating plant savings and efficiencies

ERIKS looked to their extensive supplier network to meet the needs of the customer. ERIKS selected a supplier who was able to provide the customer with a range of competitively priced, high performance, durable parts that were more cost effective alternatives to branded pump parts.

Using ERIKS suppliers' global manufacturing facilities and leveraging their engineering know-how, ERIKS were able to produce parts at highly competitive prices. In addition the supplier was in a unique position to closely control the quality and integrity of their parts as they manufactured all the key components of the pump in-house. The supplier was the first progressing cavity pump manufacturer to be certified to ISO9001 and once again the first to achieve the upgrade Quality Management System to ISO9001:2000

OTHER BENEFITS

- Same day delivery is available on request for stock items, to ensure minimum disruption and production stoppages. This industry leading service combined with competitive pricing gives you a trusted and valued source when buying your spare parts.

FURTHER COMMENTS...

This application is an excellent example of how Erik's Pump Technology ensures best value for money is consistently achieved for our clients.
