## Best Practice Principles from ERIKS

Grundfos training from ERIKS increases efficiency

### ISSUE

A large food customer was struggling with a lack of knowledge on the Grundfos CR range of pumps, particularly when it came to repair and failure analysis.

### SOLUTION

Following a meeting with ERIKS, it was suggested that a bespoke training package could be created that covered the basic knowledge needed that would help improve the customer's overall efficiency.

Engineers from the customer spent a day at the Grundfos offices, undertaking a training course designed by ERIKS specifically for their requirements covering, failure analysis and practical hands-on experience in stripping down and rebuilding CR vertical multi stage pumps.

### OTHER BENEFITS

- Increase in mean time between failures
- Manufacturing up time

### FURTHER COMMENTS...

The customer now has a better understanding of the pumps operation and can extend the life cycle due to this knowledge.
