Fenner

Fenner Geared Motor for Bakery

ERIKS increases efficiency for Bakery

ISSUE

One of ERIKS customers, a bakery, were experiencing problems on two of their applications. They contacted their local Service Centre in Southampton who sent Russ Horrigan, ERIKS Drives Technical Specialist to have a look.

SOLUTION

Russ quickly identified the problem on the incumbent drive during an on-site visit. After considering the inefficiencies of the current drive Russ suggested that a Fenner GT inline geared motor option, and inverter package.

The units were fitted in the summer of 2010, and have been running trouble-free ever since.

OTHER BENEFITS

- Reduced site downtime
- Increased drive efficiency with new product selection
- Increase plant reliability through application and product knowledge

FURTHER COMMENTS...

The customer so pleased with the performance he recommended a similar installation to a sister site in South Wales where another 2 Fenner GT's have been ordered in replacement of old Technology units supplied by the OEM.
