## Gasket Solution for Water Ingress

ERIKS prevents water ingress on roof racks

### ISSUE

When a major telecommunications company insisted that their fleet of vans accommodated roof racks, they forget to take into consideration the effect of water ingress and the potential damage to the expensive telecommunication products stocked.

Gaskets aren't always need for high specification, high temperature chemical activities. Sometimes even the most basic of applications needs a seal.

### SOLUTION

The customer contacted ERIKS Gasket Technology whose Engineers offered a simple solution to the problem.

An adhesive backed neoprene sponge foot on all four connection locations. The design offered a cheap and easy to retrofit solution. The part is now supplied as standard with the bespoke roof rack.

### OTHER BENEFITS

- The use of multi tool, CNC cutting facilities ensured high volume quantities could be manufactured economically and to exacting dimensions.

### FURTHER COMMENTS...

The customer was happy with the support of ERIKS Gasket Technology and the cost effectiveness of the solution.
