Hose storage solution for Titanium customer

Hydraulic and industrial hose storage solution

ISSUE

ERIKS had recently supplied the worlds largest supplier of high quality titanium metal products with a Gates Hydraulic Hose self-assembly system within their stores in Birmingham.

They contacted ERIKS when they started experiencing problems with storing, handling and stock checking the various sizes of hydraulic hose required. The customer asked ERIKS to find a suitable racking system to solve their problems.

SOLUTION

ERIKS utilised it's Fluid Power Core Competence Centre and sent a Hydraulic Applications Engineer to the customers site. The engineer sourced the SR07 Hose Reels pictured and demonstrated them to the customer.

The solution allows the customer to store their hose in a neat and compact fashion, allowing for easy hose dispensing. The customer was pleased with the solution and ordered one reel for their hydraulic hose and one for their industrial hose.

OTHER BENEFITS

- Neat and compact storage solution
- Easier to dispense the hose for cutting to length

FURTHER COMMENTS...

The customer was extremely please with the solution, and ordered two reels - one for their hyraulic hose and the other for their industrial hose.
