Reliable Gasket Supplier

ERIKS solve supply issues for automotive manufacturer

ISSUE

A leading car manufacturer was looking to source a competitive, like for like specification product to replace a complacent supplier that was struggling to provide a regular service to meet demanding lead-times.

The CHP plant required both BS7531 :1992 CNAF Gaskets and Graphite Gaskets working at 10 bar steam pressure on a regular basis.

SOLUTION

The customer required a better service solution and contacted ERIKS Gasket Technology who promptly supplied PT50 CNAF Gaskets to adhere to the BS7531 specification and Egraflex Graphite Gaskets to work at 10 bar steam pressure as requested.

The customer trialed the products and are now satisfied that ERIKS can supply them with the products that they require on time and within budget.

OTHER BENEFITS

- The customer has experienced no further problems with leadtimes and can see a saving on the servicing of their gasket parts

FURTHER COMMENTS...

Rapid supply of replacement Gaskets gives the customer confidence in the service, technical knowledge and overall performance of ERIKS UK.
