Custom Designed Solution Improves Reliability

Pneumatic know-how increases plant production and reliability

ISSUE

A packing unit failed at a large food packaging company, there were struggling to obtain spares for an old X-Y linear unit. Downtime was a major issue also as the unit was an old mechanical unit.

SOLUTION

The customer contact an ERIKS Fluid Power Application Engineers with a view to designing a new solution utilising latest e-drive technology EGC-120-190 Linear Drive with EMMP Controller - this solution would provide increased reliability and readily available spares.

The system was designed utilising Festo CAD and 3D models to demonstrate to the customer the desired solution and how the equipment would solve their reliability issues and increase production.

OTHER BENEFITS

- Machine reliability
- Production up-time
- Spares rapidly available from ERIKS

FURTHER COMMENTS...

The customer is completely satisfied with the solution provided by ERIKS Fluid Power, the machine is now faster and more reliable.
