Pumping Solution from ERIKS Reduces Energy Consumption

ISSUE

A large automotive customer had installed a very old centrifugal pump which was wasting a considerable amount of energy. They contacted their local ERIKS Pump Application Engineer for advice and a suitable solution.

SOLUTION

Following consultation with the site engineers, ERIKS specified a pump that is a more modern, efficient design, which will reduce the customer's power consumption by 10.1kW per hour. As with all modern equipment the pump will save energy on a daily basis as opposed to old antiquated technology.

OTHER BENEFITS

- Energy saving - over 10kW per hour
- Cost savings - by reducing the energy consumption
