## Norgren Cylinders Increases Reliability

Maintain performance and provide significant cost savings

### ISSUE

A newspaper printing company in the North East of England were using up to 40 non-standard Norgren pneumatic cylinders per annum on a print reel application.

The customer was discarding the Norgren mounting brackets and locating nuts and fabricating stronger units but due to the forces involved they were still experiencing piston rod failures.

### SOLUTION

The local ERIKS Service Centre visited the customer with an ERIKS Pneumatic Application Engineer who suggested a solution utilising a similar Norgren cylinder.

The new cylinders were also supplied without the standard Norgren mounting brackets and nuts. The customer fitted the units and has experienced no reduction in performance but significant cost savings have been achieved.

### OTHER BENEFITS

- Increased reliability

### FURTHER COMMENTS...

The cylinders have been operational for as long as the original units without any drop in performance.
