ERIKS Hose Technology Improve Production

RX Cleanfixx provides a simple solution to a long running problem

ISSUE

A large food factory had enlisted the help of a mobile hose replacement company on some of their applications, however there were subsequently some issues.

They installed three hydraulic assemblies hose into a Food washdown area, the hose wasn't FDA approved hydraulic hose and neither were the mild steel fittings. The hose cures and goes brittle causing split and burns to hands, production cleaning is interrupted every two/three weeks.

SOLUTION

With these problems at the forefront of the customers mind, they contacted ERIKS Hose Technology to investigate other alternatives to improve production schedules.

ERIKS recommended the installation of Cleanfixx Hose on the main biscuit oven lines. This hose is both FDA approved and flexible at higher temperatures and provides very simple solution to a long standing problem

OTHER BENEFITS

- Much reduced downtime
- Health and safety burn issues resolved
- Reduced cost, no mobile call outs

FURTHER COMMENTS...

On the back of the solution ERIKS offered we have also completed a full factory survey suggesting additional savings that could be made on-site
