Reduced Risk on Washdown Hoses

Correctly specified solution for Pharmaceutical customer

ISSUE

A large pharmaceutical customer was experiencing problems with their washdown hoses, in that they were bursting or fittings were blowing out.

The water could be in excess of 65°C and presented a significant risk to operatives and near misses had been experienced.

After viewing the application it was quickly identified that the hose being used was completely incorrect for the application. In addition it didn't comply with FDA standards.

SOLUTION

A new design of hose to the market was identified as being the perfect choice.

With a white EPDM liner and a smooth blue EPDM cover, the hose is non marking, flexible, easy to clean and FDA compliant.

Capable of working to 15 Bar and to temperatures of 110°C it will eliminate all risk to operatives and provide a long term working solution.

OTHER BENEFITS

- A global solution for all washdown applications
- The partnership approach has ensured a solution designed specifically for the customer that will reduce costs through increased life expectancy

FURTHER COMMENTS...

The customer is extremely pleased that the solution meets all their needs and aids compliance.
