ERIKS provide help in motor replacements

The Total Cost of Ownership Calculator promises ongoing cost savings

ISSUE

The customer was looking for the most cost effective motor replacements since problems occurred with the ones they were currently using.

ERIKS have an ongoing commitment to providing life cycle costs for new efficient motors, the purchase cost of which is only a fraction of a motors life cycle cost. It is estimated that 70% of industrial energy consumption is being directly attributed to electric Motors in the UK, demonstrating the importance of using energy efficient motors.

SOLUTION

To demonstrate ERIKS added value, the Total Cost of Ownership Calculator was implemented with this customer to be used on site to ease the decisions on plant for motor replacement followed by replenishment from stores.

The high quality service provided resulted in ongoing cost savings for the customer.

OTHER BENEFITS

- Sustainability
- Energy Saving

FURTHER COMMENTS...

Subsequently, the two applications that have been used so far have generated £1,114 of signed off cost savings for the customer.
