Actual Saving:	£909,314
Payback Period:	Immediate Saving

ERIKS Provide a Critical Pump in Less Than 24h

The Pump Was Personally Delivered by ERIKS Staff on a Saturday Morning

ISSUE

A food manufacturer had a pump failure on a critical piece of machinery and the downtime for this piece of equipment would cost the customer £48,000 per day in lost production.

The original pump was only available from the US on a 6 week lead time as were the spares. This would cost the customer £2,112,000 for this period and a solution was required urgently.

SOLUTION

ERIKS were asked to re-specify an alternative pump suitable for the machine's requirements.

The re-specified pump was only available on a 3-4 week lead time, from the manufacturer which would still mean a downtime cost of £960,000.

However, ERIKS experts managed to significantly improve on this by sourcing the pump on the same day and the pump was personally delivered by one of ERIKS employees to site for 8 am on the Saturday morning.

The pump was successfully installed avoiding unnecessary downtime and additional costs.

OTHER BENEFITS

- Reduced Downtime
- Cost Saving
- Know-How
- Reliability

FURTHER COMMENTS...

The company currently wants to swap out the other pumps to re-standardise across the site.
