## ERIKS Solve a Pump Issue in 24h

With ERIKS Experts Know-How Costly Downtime was Prevented

### ISSUE

A large dairy manufacturer approached ERIKS to solve a major pump problem with the boilers they had on-site.

A pump was urgently required to prevent the production from coming to a standstill and was only available from the manufacturer on a 4 week lead time. This would have slowed down production, requiring extra 45 man hours per day until the delivery of the pump.

### SOLUTION

After realising the urgency of the situation, ERIKS experts browsed a number of models that would meet the required duties to no avail.

With ERIKS experts' knowledge and experience the exact pump model required was sourced and delivered directly to site the same day. Thus averting any potential production downtime and maintaining ERIKS reputation as an excellent service provider.

### OTHER BENEFITS

- Technical Know-How
- Time Saving
- Prevented Downtime

### FURTHER COMMENTS...

With ERIKS' help the pump was fitted and up and running on the same day.
