ERIKS Work on Sludge Cake Conveyor Refurbishment

ERIKS Engineers Completed the Project in Less Than 14 Days Ensuring Downtime is Minimised

ISSUE

A large waste water company suffered a catastrophic failure on their sludge cake conveyor on-site. This meant that they couldn't process in any sludge, resulting in downtime for the plant.

SOLUTION

ERIKS have been called in to have a look at the unit and conduct the needed repairs. After a thorough inspection of the conveyor, it was found that there was a lot more work to be done than what the customer initially expected. They decided to undertake a complete refurbishment of the conveyor conducted by ERIKS Engineers.

Time was crucial for the company because during the refurbishment process, the sludge needed to be tankered off site which was costing the company £8,000 per day. The full refurbishment works were completed in 14 days.

The customer was extremely satisfied with the outcome since the fully refurbished conveyor ensured the sound working of the system for at least 3-5 years!

OTHER BENEFITS

- Technical Know-How
- Time-Efficient Service
- Minimised Downtime
